

THE BOILER

 The Anvil

Our Story

The Boiler pre-seed startup accelerator competition is back for the fifth year to promote our mission of enabling student startups at Purdue University. The competition lasts for 12 weeks and helps early stage student startups get access to the resources and people they need to succeed and become revenue generating.

Past Winners

Here are some companies that came out of The Boiler:

- ▶ **Mimir** is a company founded out of The Anvil that calls itself a “cloud classroom for higher education.” Mimir has gone on to close two seed rounds of funding, raising \$1.5M, and their platform is used in over 70 schools worldwide including UCLA and John Hopkins. Their founders have been recognized by Forbes 30 Under 30.
- ▶ **Perceive** is a company started by former Purdue students, helping retailers and brands measure their marketing effectiveness by analyzing in-store video. They have raised over \$750k in grants from the National Science Foundation.
- ▶ **Slate Safe** is developing technology that helps safeguard package delivery. In addition to The Boiler, they were also featured at the 2018 Cozard New Venture Competition at University of Illinois, Urbana-Champaign.

What's new in 2019?

We are making many new changes to The Boiler this year to help create long lasting startups from our space. To allow our startups to gain more traction, we are doubling the length of the program to 12 weeks. We are also focusing on mentoring the startups so that they will be in a position to make revenue by the end of the competition. New for The Boiler this year is a series of workshops serve as a precursor to the Spring 2019 Boiler pre-seed startup accelerator, to get students engaged with their startup ideas early on.
